

UNIVERSAL SEAT BACK HOLDER *USB*

The North American Rescue Universal Seat Back Holder (USB) was designed to provide users with an easily accessible storage and organization system for essential medical and operational gear within a vehicle. This storage platform mounts easily to the back of most vehicle seats. The large laser cut laminate panel allows for secure organization of gear, while the adjustable attachment straps keep the panel tight against the seat back to optimize vehicle space. The MOLLE/PALS mounting points are compatible with many accessories, allowing for endless customization that tailors the positioning of items to your preferences. The USB can easily store a similar capacity to a vehicle go bag or medical aid bag conveniently located consistently for deployment. The MOLLE slits are backwards compatible design to accommodate any existing Nylon or Laser Cut standard MOLLE back platforms. The USB features a Tegriss® Thermoplastic Composite inner layer providing the rigidity for the system.

Item includes headrest strap and two girth hitched seat base straps, while offering easy removal using 3 conveniently located 1" plastic side release buckles.

For quick removal of individual MOLLE components NAR recommends the use of NAR's quick detach panels.

Accessory items for separate purchase are the USB Shoulder Straps and USB Malleable Bar. The USB shoulder straps are a set of hasty use super low-profile laser cut straps. They easily connect and disconnect with metal G-hook buckles directly to the back of the USB. The straps are designed to hide seamlessly against the back of the USB out of the way until user needs to quickly respond to an incident with their entire USB load out. The USB can be removed, and shoulder straps donned in under 10 seconds.

Also available for the USB's are the Aluminum Malleable Bar that can be hand formed to the profile of your seat back. The bar slides easily into and out of the back of each USB. This allows users to form their USB to any vehicle seat back reducing gear hang and optimizing passenger leg room.

**Universal Seat Back Holder sold separately. Check out NARescue.com for quick detach panels, kits, gear, and accessories.*
