

INDIVIDUAL AID KIT

REV120718

Specifically designed for use by non-medically trained personnel...

North American Rescue's compact, Individual Aid Kit is designed to treat bleeding from penetrating and other traumatic injuries. The vacuum-sealed pouch is easy-to-open and comes stocked with the needed supplies to begin treatment until help arrives.

Specifically tailored for non-medically trained individuals/caregivers to control bleeding until medical professionals or first responders can arrive on scene. The individual aid kit is compact enough to be carried or stored almost anywhere, and is specifically designed to control bleeding and cover penetrating injuries.

Features:

- Compact first aid kit to treat penetrating and other traumatic injuries
- Designed for non-medically trained caregivers to control bleeding until medically trained responders arrive on scene
