

QUANTUM TRAINER SYSTEM

REV061423

The Quantum™ Trainer System is designed for instructional and training purposes ONLY.

The Quantum™ Trainer System is designed to facilitate training and practice in treatment simulations utilizing blood, IV solutions, or other training aids. This innovative trainer enables users to familiarize themselves with the essential steps involved in preparing and operating the Quantum™ Blood and Fluid Warming System.

The Quantum™ Trainer Tubing Set is a component for use with the Quantum™ Trainer System ONLY. It is designed for non-warming training purposes and does not contain any heating elements. With its user-friendly design, users can confidently practice the setup process, fluid container placement, and connection techniques, simulating a real-life scenario.

Specifications:

- Allows medical trainers to thoroughly instruct personnel on the proper usage of the Quantum™ Blood and Fluid Warming System. NOT FOR CLINICAL USE. The Quantum™ Trainer System is designed for instructional and training purposes ONLY.

Kit Contents:

- 2 x Trainer Tubing Sets
