

CAT[®] TRAINER *Combat Application Tourniquet - Trainer Blue*

REV011223

Blue C-A-T[®] Tourniquet Training Device...

Identifying the need for an effective C-A-T Tourniquet training device, North American Rescue has developed the Blue C-A-T specifically for use as a training device - though fully functional the blue coloring offers users an immediate identifiable visual clue that it is for training.

The patented C-A-T[®] is a true one-handed tourniquet proven to be 100% effective by the U.S. Army's Institute of Surgical Research. Tests proved that the C-A-T[®] completely occluded blood flow of an extremity in the event of a traumatic wound with significant hemorrhage.

The blue coloring of the Trainer version of the C-A-T[®] Tourniquet provides a distinct visual means to identify it as the training version and to distinguish it from personal and operational life-saving devices.

Features:

- Enables instructors and trainees the ability to have hands-on training and tourniquet application practice
- The Blue Color provides a distinct visual means to distinguish it as a training device

Dimensions:

- Packaged: L 6.5 in. x W 2.4 in. x D 1.5 in.
- Open Length: 37.5 in.
- Weight: 3.04 oz

Fully functioning C-A-T[®] Tourniquet colored blue to identify it as a training device

C-A-T[®] Tourniquet Trainer - Gen 7
