

SCREW LOCK CARABINER - 5MM OVAL *Quick Link SS*

REV071423

The Quick Link Screw Lock 5mm Oval Carabiner is intended to serve as a connection element between components. It can also be used as an assembly device for a fall protection system for connecting directly or indirectly to an anchor point. When closed with a wrench, it becomes a semi-permanent anchor ring.

These oval carabiners are perfect for applications requiring high strength, fixed connections. Manufactured from stainless steel, they are suitable for outdoor installations or corrosive environments.

Features:

- Best used for high strength, fixed connections
- Safe for outdoor installations and corrosive environments
- Manufactured from stainless steel
- Screw lock for secure connections

Specifications:

- Rod stock diameter: 5 mm
- Gate opening: 6 mm
- Material(s): steel
- Certification(s): NOT CE Certified

Strength:

- Major axis strength: 25 kN

Dimensions:

- Height: 1.97 in. (50 mm)
- Width: 0.98 in. (25 mm)
- Weight: 0.05 lb (0.7 oz)
