

CHITOGAUZE XR2 PRO HEMOSTATIC BANDAGE

REV 072523

Introducing ChitoGauze® XR2 Pro, a hemostatic dressing for external, temporary control of severely bleeding wounds.

It is the next generation of chitosan dressing that is composed of a polyester/rayon blend non-woven medical gauze that is coated with chitosan. Featuring two embedded x-ray detectable strips, it is Z-folded and packaged in a vacuum sealed pouch that is compact and rugged. ChitoGauze® XR PRO maximizes hemostatic performance and reduces the risk of re-bleeding by providing effective hemostasis outside of the normal clotting cascade.

ChitoGauze® XR PRO also has natural antibacterial properties against a wide range of gram-positive and gram-negative microorganisms which are beneficial in presence of debris and environment before the injured are treated with antibiotics or are transferred to a medical treatment facility. Designed for the battlefield, ChitoGauze® XR2 PRO is an efficacious and easy-to-apply dressing that maximizes hemostatic performance before severe bleeding turns deadly.

Specifications:

- Z-Fold Vacuum Packed for easy application
- Featuring unique dual line of embedded x-ray detectable strips
- Readily conforms into the wound surfaces with complex geometries to rapidly staunch bleeding and seal the wound site
- Offers antimicrobial properties against 26 bacterial organisms
- Non-woven, polyester/rayon blend medical gauze is coated with chitosan to maximize its performance and control severe bleeding

Dimensions:

- Package Size: H 5.75 in. x W 5.0 in. x D 0.65 in.
- Product Size: 3 in. x 4 yd
- Weight: 0.045 lbs
