

TRAUMA AND FIRST AID WATERTIGHT KIT

REV062524

Neatly Organized and Watertight

The Trauma and First Aid Kit – Watertight (TFAK-W) from North American Rescue® is a portable, watertight Trauma & First Aid Kit that comes equipped with essential trauma and first aid supplies. North American Rescue® partnered with Watershed® Drybags to create a custom drybag container that not only is durable and watertight, but also neatly organized with removeable treatment pouches. The kit includes the essential trauma equipment to address moderate to severe bleeding and penetrating injuries. The contents are broken down by injury/treatment categories and are packed in a clearly labeled, removeable, zipper accessed mesh pouch that is easy to use. The TFAK-W can be hand carried, worn as a waist pack, or carried over the shoulder.

Cleaning and care: Wash with mild soap and water. Avoid the use of bug sprays and sunscreens as they can weaken the material of the bag.

TFAK-WATERTIGHT

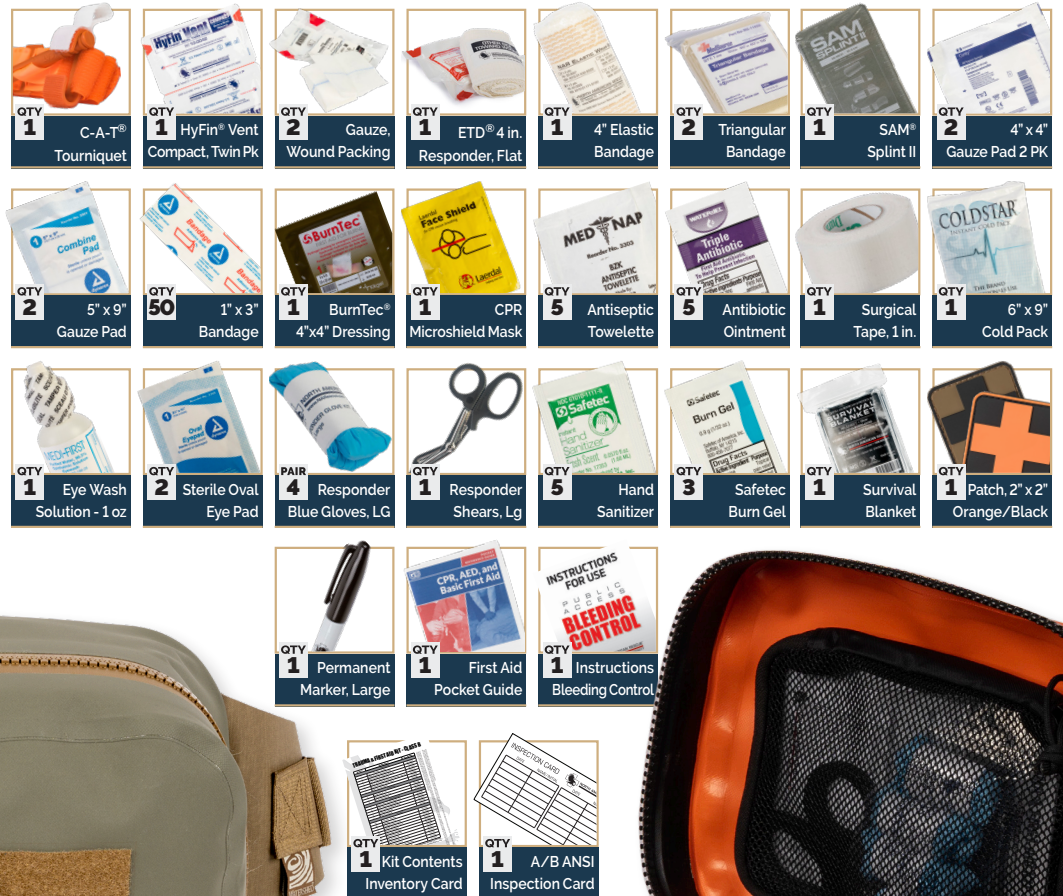

COLOR	ITEM#
