

ROO® MINI FIRST AID KIT (M-FAK - LCL)

REV041624

One of our most compact First Aid Kits with rapid one-handed tourniquet access, now available in laser cut nylon!

The ROO® M-FAK LCL, one of North American Rescue's most compact Mini First Aid Kit platforms, was designed with versatile, multi-use options for delivering immediate critical care in the treatment of penetrating, blast or other traumatic injuries in the field. Despite its reduced size, this kit comes fully loaded with the critical medical equipment most requested by First Responders operating in the line of duty. Treatment pack out options include Basic, Basic with Combat Gauze LE and Advanced with Combat Gauze LE versions.

The ROO® M-FAK's super compact, rugged nylon bag features a unique front tourniquet pouch that easily opens with the pull of a tab for rapid one handed access to your tourniquet without the need to open the full kit. Multiple elastic loops on the interior allow for secure gear organization, while it's rugged exterior includes a Laser Cut Laminate (LCL) MOLLE style attachment for mounting in the standard vertical position as well as a 3 in. internal sleeve that accommodates horizontal attachment to your duty belt.
