

AMPHIBIOUS AID KIT *Watertight - ADV*

REV062024

Wherever Life Takes You, Be Prepared

The Amphibious Aid Kit (Watertight)- from North American Rescue® is designed as a portable First Aid Kit for use in the workplace that exceeds the ANSI/ISEA Z308.1-2021 Standard for Class B kits. This is accomplished by adding additional bleeding control elements proven to save lives. To bring this kit to the market, NAR partnered with Watershed, the manufacturer of drybags and other watertight containers used by the US military special operations community to keep their sensitive gear dry while conducting maritime and underwater operations. The kit contents are arranged in labeled and zipper-accessed mesh pouches. This kit supplies not only the item needed to treat the most common workplace injuries but many of the most serious, life threatening with the C-A-T® Tourniquet, the fastest, safest, most effective prehospital field tourniquet on the market today. Advanced Kit options include: Advanced with Combat Gauze®, and Advanced with CELOX™. The Advanced versions additionally include an NPA and BVM for breathing capabilities.
