

PATROL VEHICLE TRAUMA KIT

REV062124

Easily accessible, quick to deploy from every vehicle both on and off duty...

The Patrol Vehicle Trauma Kit from North American Rescue® was designed to provide personnel with an easily accessible, quick to deploy medical kit from your Patrol Vehicle. It's modular storage system comes organized with an array of medical products ranging from basic first aid to more intermediate trauma care.

One side of the bag's exterior includes trauma shears at the ready as well as several pairs of nitrile gloves, while the opposite side features a MOLLE-style system to accommodate extra equipment as needed, such as additional tourniquets, ammo, or personal protective equipment. This arrangement is ideal for customizing the carriage of gear that requires immediate access.

Once the zippered bag is opened, one compartment contains items to cover all your agency needs for basic first aid and community assistance while the opposite side offers a first time combination of both Basic First Aid and Basic Trauma medical items. This configuration gives every officer not just a basic first aid kit, but everything needed to save a life in more extreme injuries. With Law Enforcement usually being first on scene in bad situations, the Patrol Vehicle Trauma Kit is a "must have" for every patrol vehicle both on and off duty!

Features:

- Provide personnel with an easily accessible, quick to deploy medical kit
- Modular storage system comes organized with an array of medical products ranging from basic first aid to more intermediate trauma care
