

AMPHIBIOUS AID ADVANCED KITS

WATERTIGHT

Keep Sensitive Gear Dry While Conducting Maritime And Underwater Operations

The Amphibious Aid Kit (Watertight)- from North American Rescue® is designed as a portable First Aid Kit for use in the workplace that exceeds the ANSI/ISEA Z308.1-2021 Standard for Class B kits. This is accomplished by adding additional bleeding control elements proven to save lives. To bring this kit to the market, NAR® partnered with Watershed®, the manufacturer of drybags and other watertight containers used by the US military special operations community to keep their sensitive gear dry while conducting maritime and underwater operations. The kit contents are arranged in labeled and zipper-accessed mesh pouches. This kit supplies not only the item needed to treat the most common workplace injuries but many of the most serious, life threatening with the C-A-T® Tourniquet, the safest and most effective prehospital tourniquet on the market today. This kit comes in Advanced with Combat Gauze®, and Advanced with Celox™. The Advanced versions additionally include a NPA and BVM for breathing capabilities.
